Report Summary:

This report is about a software called Enterprise Resource Planning that deals with a program specifically directed to the accounting area.

In this program we will be able to enter through a username and password to a menu where we will find three sections that are the following: Enterprise Resource Planning, Human Resources and Department Finance

Enterprise Resource Planning, where we will find three sections as follows.

The About, where we will find a brief description of what the company is, how it works and on which the work carried out by the company is based, there will also be a brief description in which it will be specified which work area our program will enter, in In the Contact section, the personal data of each person will be entered when entering the program and we will have the Exit option through which we can exit the program.

Human Resources, where we find the record of each employee with their positions and activities carried out within the company.

Department Finance, where we can find different sections such as the pay roll, the salary of each worker within the company, the monetarization and a section in which we can find the expenses they make within the company.
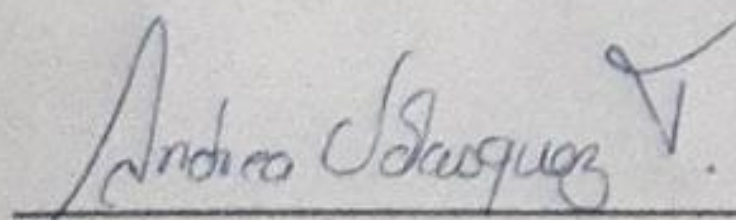

What it corrected:

It is recommended to change the Help window to that of contacts with more data so that the customer service contacts the customer, a box to specify the reason for the user and a message that tells the customer that their message was sent.

Eliminate Salary and add in the payment rool a record for when employees work overtime together with their salary to add that value and add the names of the organizations where the money enters, being the municipalities.

Add an employee window to manage expenses, the types of expenses such as transfers and add the names of the companies that are responsible for each expense with the respective amount.
